

summary

KiSS DP-1500 is based on the Slim Line DivX® Compatible DVD Player KiSS DP-1000, but it also has a built-in Ethernet Port and a PC Card Slot, enabling it, if con-

nected to a Broadband Internet Connection to read Audio/Video/Picture content straight from a PC with the KiSS PC-Link Software as well as playing Internet Radio Station with WebRadio. WebRadio, with its friendly interface provides the user with a few thousands radio stations to choose from, all classified by genre and countries. The PC Card Slot placed at the back of the player, also adds a new

feature: Wireless Connection. No more ethernet cables in the way, thanks to a simple setup on the player, this function will help the users keep their living room away from their computer room. KiSS provides the Access Point and PC Card (IEEE 802.11b) as extra accessories. As all KiSS DVD players, the KiSS DP-1500 can play all DivX® files, 3.11, 4 and 5. It can also play MPEG-4, XviD files on the

video side. It also comes complete with the standard CD/MP3, Ogg Vorbis, Jpeg, CD-RW and DVD+/-RW playback. As KiSS is keen to keep a close relationship with its customers, new firmware updates are regularly available on our website. Updating a player remains a simple operation that will enable bug fixes and new features to run on the player.

watch out for

ETHERNET AND WIRELESS CONNECTION

The big new feature with the KiSS DP-1500 is the ethernet connection found on its back as well as a PC card Slot for Wireless Connection, Access Point and PC Card available as accessories. Connected to a Broadband Internet connection it will enable your DVD player to read files (movies, pictures or music) straight from your PC, as well as listen to Internet radio.

WEBRADIO

Thanks to its ethernet/wireless connection, the DP-1500 is the only player on the market to provide users with a direct connection to the Internet. This internet connection enables the KiSS DP-1500 to play internet radio. Just select this feature on the Player, and you will have access to a few thousand radio stations that can be streamed and played on the DP-1500.

KISS PC-LINK

KiSS PC-Link is a software that enables the KiSS DP-1500 user to play music, see pictures and view movies from a PC to the DivX compatible DVD player thanks to the ethernet connection found on the back of the player. KiSS PC-Link is a user-friendly software to install on a PC running at least Windows 98, it is easy to select any media files on a PC's hard disk.

5 STEP QUICK SETUP

To tackle long and too technical setup problem, KiSS introduces a Five Step Quick Setup to its DP-1500 model. As soon as the player is plugged-in for the first time, a clear and user friendly graphic interface asks the user to select its language, video connection, screen size, audio connection and enter its IP address. Once the selection has been made, the player is ready to be used.

BEST EVER DivX® COMPATIBILITY

KiSS SB-010 play all DivX format. DivX® 3.11, DivX® 4 and DivX® 5. What does this mean for you? It means that now, for the first time, you can download full-screen, full-motion videos from the Internet that actually look and sound like what you get from your television or DVD player. With DivX® compression, you can download and watch high-quality video on your TV.

FIRMWARE UPGRADABLE

KiSS is keen in keeping a special relation with its customers, so, even after a player has been sold, its software and technology keeps moving. The firmware of the player keeps updated with the latest research and development and KiSS is able to release a firmware update on a regular basis. This latest firmware is available from our web site in the support section.
